

01 Get it

02 Trust it

03 Use it

04 Stretch it

MCP 101 · USE IT · WORKFLOW PLAYS

From prompt *to playbook*

Single prompts impress people once. Workflows are what keep them coming back.

Plays for reps, managers and VPs that run on a rhythm your team already keeps.

Every play has four parts

Learn the shape once, and any play in this deck reads the same way.

01 · WHEN

The trigger

A moment already on the calendar: the morning, the 1:1, the forecast call, the QBR.

02 · WITH

The ingredients

Backstory pulls in calendar, email and calls, filters sensitive content and enriches every record.

03 · STEPS

The chain

Ask three or four questions in the same chat. Each one picks up where the last answer left off.

04 · YOU GET

The deliverable

Something you'd use anyway: a plan, a brief, a narrative. Not a chat transcript.

EXAMPLE · REP MORNING PREP

One play per role, matched to its rhythm

REP

Daily

9:00	Halden Freight	●
11:30	Corvia Health	●
2:00	Vantage Retail	●

Morning prep that builds your Win the Day plan

Start the day knowing which accounts need you, and why.

MANAGER

Weekly

1:1 and forecast call prep

Walk into every conversation with the evidence already in hand.

VP

Quarterly

QBR narrative from activity patterns

Tell the story of the quarter from what actually happened in accounts.

PLAY 01 · REP · DAILY

Morning prep

Chained into your existing Win the Day framework. Ten minutes before the first call.

TODAY · TUESDAY		MOCK DATA
9:00	Halden Freight	CFO quiet 26 days
11:30	Corvia Health	Security review open
2:00	Vantage Retail	New VP engaged
4:00	Internal deal review	Bring pricing Q
■ Flags pulled from Backstory activity		

Know where to spend today before the first call

WHEN

Every morning, before your first meeting

WITH

Backstory, with calendar, email and calls already synced

YOU GET

Your Win the Day priorities, backed by account evidence

HOW TO · SAVE YOUR FORMAT ONCE

Add it to your Claude Project instructions, so step 4 works every time:

“When I say Win the Day, use: top two priorities, meetings to prep, follow-ups to send.”

STEP 1 *“Using Backstory, what meetings do I have today, and what’s the latest on each account?”*

Pulls the day's meetings and the account history behind them.

STEP 2 *“Which of my open deals had activity or went quiet since yesterday?”*

Catches what moved overnight, including new email replies.

STEP 3 *“What’s the one thing I should do on each of those deals today?”*

Turns signal into next actions.

STEP 4 *“Put that into my Win the Day format: top two priorities, meetings to prep, and follow-ups to send.”*

Drops straight into the framework your team already runs.

A Win the Day plan that writes its own first draft

BEFORE

Scanning the calendar, inbox and CRM, then deciding from memory.

Twenty minutes of tab-hopping, and the quiet deal still gets missed.

AFTER · CLAUDE WITH BACKSTORY MCP

MOCK DATA

Win the Day · Tuesday

PRIORITY 1	Vantage Retail: champion replied overnight asking about pricing. Send the revised proposal before the 2pm call.
PRIORITY 2	Halden Freight: no customer contact in 18 days. Re-engage the economic buyer.
PREP	11am with Corvia Health: last meeting flagged an open security review.
FOLLOW-UP	Send recap and next steps from yesterday's Vantage Retail demo.

WHY IT WORKS

The plan comes from what actually happened in your accounts, so the quiet deal shows up before it goes cold.

PLAYS 02-03 · MANAGER · WEEKLY

1:1 and forecast prep

Two plays for the two meetings that shape every week. Shown with before and after output.

THIS WEEK		MOCK DATA
Mon	Team review	Coaching focus
Tue	1:1 · Priya	Play 02
Tue	1:1 · Marcus	Play 02
Wed	Forecast call	Play 03

Every standing meeting has a prompt

Start the 1:1 at the conversation, not the status update

WHEN

30 minutes before each 1:1

WITH

Backstory

YOU GET

A one-page brief per rep with coaching points

STEP 1 *“Using Backstory, summarize Priya’s top five open deals: stage, recent activity and next step.”*

The status update, done before you walk in.

STEP 2 *“Which of those have had no customer meeting in the last 21 days?”*

Surfaces where the deal may be stalling.

STEP 3 *“Where is she single-threaded or missing an exec contact?”*

Finds the gaps worth coaching.

STEP 4 *“Turn that into a 1:1 brief: wins to recognize, two deals to dig into, and one coaching question.”*

A brief you can bring into the room.

From status readout to coaching conversation

BEFORE

The rep walks through every deal, one by one.

Without Backstory doing the prep, the 1:1 turns into sifting through status instead of coaching the rep and building strategy.

AFTER · CLAUDE WITH BACKSTORY MCP

MOCK DATA

1:1 brief · Priya

RECOGNIZE	Vantage Retail moved to proposal after a strong exec meeting last week.
DIG INTO	Halden Freight: 24 days without a customer meeting, close date this month.
DIG INTO	Corvia Health: only one contact engaged, no economic buyer yet.
ASK	“Who else at Corvia Health needs to say yes, and how do we reach them?”

WHY IT WORKS Backstory brings the status and the context behind it, ready to drill into. The 1:1 goes to coaching, strategy and next plays.

Walk into the forecast call knowing what moved

WHEN

Anytime before the forecast call. The data is always current.

WITH

Backstory

YOU GET

What changed in the forecast this week, plus the deals to dig into on the call

IN BACKSTORY FORECASTING

STEP 1 *“Using Backstory, which deals in my team’s commit changed stage, amount or close date this week?”*

The change log, without the spreadsheet export.

STEP 2 *“Which commit deals have no exec contact in the last 30 days?”*

Flags risk the stage alone won't show.

STEP 3 *“For each flagged deal, what’s the evidence for and against it closing this quarter?”*

Keeps the call grounded in activity.

STEP 4 *“Using Backstory, pull this week’s forecast headlines and pipeline changes, and give me three questions to ask.”*

Backstory Forecasting tracks this already. Claude builds your call plan.

From spreadsheet archaeology to three sharp questions

Backstory Forecasting surfaces what moved and why. You walk into the call ready to challenge the right deals, not hunting for them.

BEFORE

Exporting the pipeline and comparing it to last week by hand.

An hour of prep, and the call still runs on the rep's word.

AFTER · CLAUDE WITH BACKSTORY MCP

MOCK DATA

Forecast prep · Week 7

MOVED	Two commit deals pushed close dates into next quarter.
AT RISK	Halden Freight: in commit, no exec contact in 34 days.
UPSIDE	Vantage Retail: new VP stakeholder joined the last two meetings.
ASK	"What would have to be true for Halden Freight to sign this month?"

WHY IT WORKS Each call on the forecast comes with evidence, so the conversation moves from opinion to action.

Backstory Forecasting does the prep

The same data Claude reads through Backstory MCP, shown where your team already works.

PIPELINE CHANGES

See what moved this week

Slipped, pulled in, pushed and won, with the deals behind each bar.

ASK ACROSS DEALS

Find the pattern in seconds

Ask Backstory about several deals at once and get the shared risks back.

PLAY 04 · VP · QUARTERLY

The QBR narrative

Built from account activity patterns, not a stack of rep updates.

Tell the story of the quarter from what actually happened

WHEN

Two weeks before the QBR

WITH

Backstory

YOU GET

A draft QBR narrative with the evidence behind each point

SAMPLE · QBR PREP

Q3 QBR · Narrative draft

MOCK DATA

WORKED Exec sponsor engaged before proposal

DIDN'T Deals stalled after security review

TREND Mid-market up, enterprise flat

CHANGE Bring security in at scoping

 Drafted from Backstory account activity

STEP 1 *“Using Backstory, across deals we won this quarter, what did the buying groups and timelines have in common?”*

Finds the win pattern.

STEP 2 *“Across deals we lost or that slipped, where did engagement drop off, and at what stage?”*

Finds the loss pattern.

STEP 3 *“Which segments show rising or falling activity compared with last quarter?”*

Adds the trend line.

STEP 4 *“Draft the QBR narrative: what worked, what didn’t, what we’re changing, with one example for each.”*

A first draft ready for your edits.

A narrative with receipts

BEFORE

Asking every manager for a summary, then stitching the slides together.

The story reflects what people remember, not what happened in accounts.

AFTER · CLAUDE WITH BACKSTORY MCP

MOCK DATA

QBR narrative · Draft

WHAT WORKED

Won deals had an exec sponsor engaged before proposal.

WHAT DIDN'T

Slipped deals lost momentum after security review, with no new contacts added.

TREND

Mid-market activity is up. Enterprise meeting volume is flat.

WHAT CHANGES

Bring security into scoping earlier on every enterprise deal.

WHY IT WORKS

Patterns across every account show up in one pass, with an example ready for each claim.

DID YOU KNOW?

Power moves

The most valuable capabilities are the ones nobody thinks to try.

Three moves that turn a play into a habit

01

One prompt, full picture

Backstory already syncs calendar, email and calls, so one prompt covers them all.

TRY

"Prep me for tomorrow's meetings using Backstory, including the latest email on each account."

02

Standing instructions

A Claude Project that checks Backstory every time, so users stop re-explaining context.

TRY

"For every account question, check Backstory first and cite the meetings you used."

03

Output as the deliverable

Turn an account summary directly into a doc or a formatted brief for the exec sponsor.

TRY

"Turn this into a one-page brief for Vantage Retail's exec sponsor."

Set it once in a Claude Project

A Claude Project holds instructions that apply to every conversation inside it. Write them once, and every play starts with the same context.

GOOD TO INCLUDE

Your role and territory · Check Backstory first · Cite sources ·
Your output formats

PROJECT INSTRUCTIONS · EXAMPLE

[EDIT FOR YOUR TEAM](#)

I'm an account executive covering mid-market retail accounts.

For any question about an account, deal or contact, check Backstory first. Name the meetings and emails you used.

If Backstory has little or no activity for an account, say so rather than filling the gap.

When I ask for a brief, use three sections: what changed, risks, next steps.
