CHAPTER 01: THE CONNECTION

The Problem: *Drowning in the generic.*

SCENARIO

“You paste your account data into Claude. It gives you something plausible but generic. You paste in more context but still get a generic response. You give up and look it up yourself.”

Sound familiar?

The Backstory Solution:

Model Context Protocol (MCP)

With MCP, Claude already knows every account, every deal, and every signal in real-time.

No copy-pasting required.

© Backstory | All Rights Reserved

CHAPTER 01: THE CONNECTION

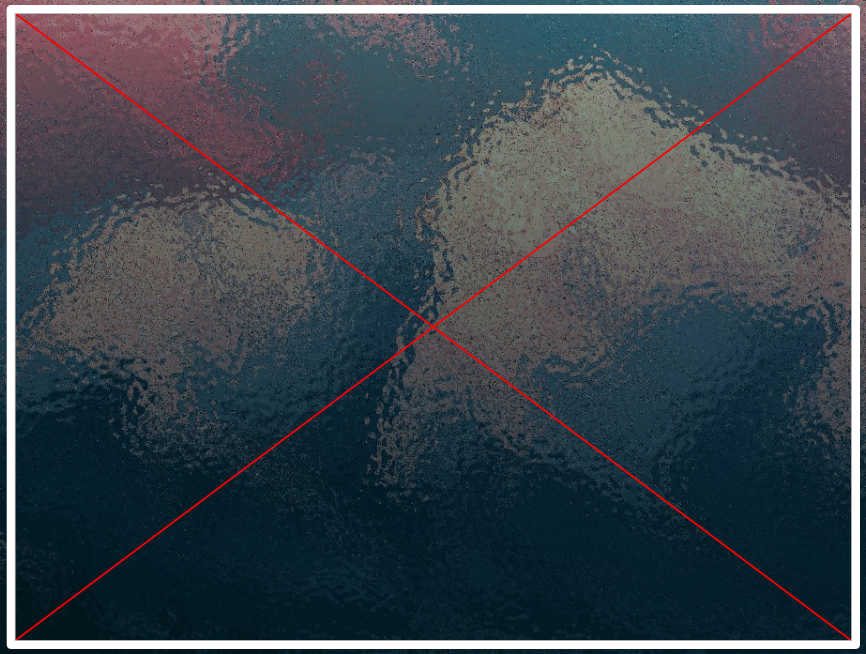

Intelligence that lives *where work happens.*

Revenue leaders don't need more dashboards. You need answers to the questions that keep you up at night.

Backstory solves this challenge by turning activity signals into clear answers to close deals faster and grow pipeline predictably.

Model Context Protocol (MCP) delivers Backstory's Revenue Reasoning directly into the tools your team already uses - Claude, Copilot, or ChatGPT.

MCP in Action

Backstory

MCP CASE STUDY: VOICE OF THE CUSTOMER

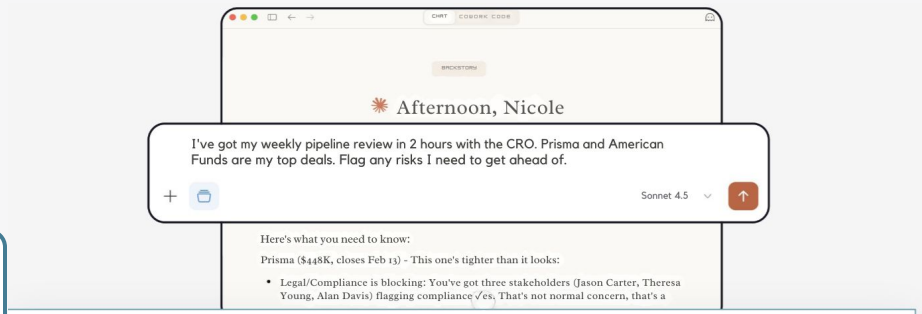

MCP Intelligence that *wins deals.*

Red Hat is the world's leading provider of enterprise open-source solutions. With 20,000+ employees and $6B+ revenue, their GTM teams faced critical data challenges.

Revenue data was scattered, sellers were drowning in manual logging, and account planning was rarely revisited.

AFTER BACKSTORY

- MEDDPICC qualification standardized globally inside CRM
- AI surfacing deal risks in real time
- Proactive coaching interventions
- **50%+ higher win rates** on deals with 70%+ MEDDPICC completion

Red Hat

Andrew Brown

"Backstory's open architecture fits perfectly with our vision to become an AI enabled enterprise. Our sales team now has the intelligence they need to make informed decisions. This resulted in win rates that improved by over 50 percent."
Senior Vice President and Chief Revenue Oficer

This resulted in win rates that improved by **over 50 percent**.

Intelligence now lives exactly where work happens, providing revenue reasoning directly to the tools teams use every day.

CHAPTER 02 · THE TOOLS

The Revenue *Intelligence Suite.*

A deep dive into the specialized AI tools and strategic plays designed to run directly inside your daily client communication workflows.

© Backstory | All Rights Reserved

Backstory

CHAPTER 02 · THE TOOLS

Twelve tools, *six plays per role.*

An elite suite of specialized AI tools designed to surface real-time revenue intelligence directly inside your daily workflows, streamlining critical operations across key tactical scenarios for Account Executives (AE) and Account Managers (AM).

SYSTEM OVERVIEW

The 12 Connected Tools

Twelve purpose-built discovery, intelligence, and analytical systems mapping CRM data directly to the AI environments teams use daily. Expose real-time deal health, stakeholder networks, and company activity instantly.

THE PLAYBOOK

6 Plays each for AE & AMs

Six tactical scenarios detailing exact prompts, specific AE & AM use cases, and the underlying MCP intelligence engines that power team execution. Tailor discovery and accelerate complex sales cycles systematically.

© Backstory | All Rights Reserved

Twelve purpose-built tools, *one connected AI.*

MCP tools expose real-time revenue intelligence directly inside the AI clients your team already uses.

ACCOUNT DISCOVERY

find_account
Locates account by name. Returns Backstory ID, domain, and opportunities.

find_record_by_crm_id
Resolves Salesforce CRM IDs directly to Backstory records.

top_records
Surfaces top 20 most relevant accounts based on engagement metrics.

ACCOUNT INTELLIGENCE

get_account_status
Overview of risks, next steps, and trending discussion topics.

get_recent_account_activity
Full 30-day history of emails, meetings, and extracted insights.

account_company_news
Categorized news, M&A, and financial performance for public firms.

OPPORTUNITY INTEL

get_opportunity_status
Deal-specific health snapshot, momentum, and risk indicators.

get_recent_opportunity_activity
Granular interaction history scoped strictly to one opportunity.

get_engaged_people
Identifies internal and external stakeholders active in last 30 days.

AI ASSISTANT & SOURCES

get_scorecard
Retrieves full ClosePlan scorecard and strategic qualification data.

ask_sales_ai_about_account
Natural-language research and strategic analysis on account level.

ask_sales_ai_about_opportunity
Expert deal-level synthesis, win/loss advice, and coaching.

All tools respect your existing Backstory permissions. No data leaves the Backstory environment.

Backstory

CHAPTER 02 · THE TOOLS

The optimal flow for *any account question.*

Follow this precise MCP tool sequence to systematically discover, qualify, analyze, and synthesize critical account intelligence.

01

find_account

Locates the target account by name instantly. Returns the verified Backstory ID, domain mapping, and active revenue opportunities.

02

get_account_status

Generates a high-level overview of immediate risks, critical next steps, and trending discussion topics across active deals.

03

get_recent_activity

Surfaces a 30-day chronological history of client emails, calendar meetings, and automatically extracted conversational insights.

04

ask_sales_ai

Concludes with natural-language strategic analysis. Prompt the AI directly to synthesize findings and generate actionable execution steps.

CHAPTER 03 · REP PLAYS

Tailored Plays for *Account Reps.*

A deep dive into strategic plays, tactical scenarios, ready-to-use prompts, and specialized MCP tools built to accelerate pipeline.

© Backstory | All Rights Reserved

CHAPTER 03 · REP PLAYS

Six tailored plays for *high-performing account reps.*

A deep dive into Plays 1, 2, and 3: Specific tactical scenarios, ready-to-use prompts, and purpose-built MCP tools.

Morning · Daily startup

Play 1: The Priority Scan

"You open your AI before email. You want to know what moved overnight and where to spend today."

```
"Show me my top accounts and flag
anything that needs attention today
based on recent activity and
signals."
```

`top_records` `get_account_status`

Pre-call · 5m before meeting

Play 2: The Call Brief

"You have a call in 5m with the VP at Vantage Systems. You haven't looked at the account in a week."

```
"Give me a pre-call brief for my
meeting with Vantage Systems.
Include last contacts, open
commitments, and risks."
```

`find_account` `get_account_status` `get_engaged`

After call · Follow-up draft

Play 3: Context Follow-Up

"You just finished a call with Crestline Group. You need a tailored follow-up that references what was discussed."

```
"Draft a follow-up email for
Crestline Group based on our most
recent conversation. Reference
specific topics."
```

`find_account` `get_recent_account_activity`

© Backstory | All Rights Reserved

Tailored plays for *stuck pipeline & outreach (Plays 4–6)*

Specific tactical scenarios, ready-to-use prompts, and the purpose-built MCP tools that power them.

Deal review · Stuck pipeline

Play 4

The Deal Unsticker

The Scenario

"The Northfield Co deal has been stuck in the same stage for 3 weeks. Your manager is going to ask about it."

The Prompt

```
"Analyze Northfield Co opportunity. What are current risks, what's stalling progress, and what's the next step?"
```

`find_account`
`get_opportunity`
`ask_sales`

Buying committee · Multi-threading

Play 5

The Coverage Check

The Scenario

"You've been active but you're not sure you are covering the right people. You want to see who is missing."

The Prompt

```
"Who are the most and least engaged stakeholders? Identify any key personas I haven't touched in 30 days."
```

`find_account`
`get_engaged_people`
`ask_sales`

Public signals · Outreach hook

Play 6

The News Hook

The Scenario

"You're prospecting into a public company and want a timely, relevant reason to reach out that isn't generic."

The Prompt

```
"Pull recent news and filings. Identify organizational, financial, or strategic shifts I can use as an outreach hook."
```

`find_account`
`company_news`

© Backstory | All Rights Reserved

Analyzing the impact of *data freshness & tool integration*

How real-time signals, CRM connectivity, and automated workflows accelerate tactical deal execution.

Infrastructure · System Configuration

Data Freshness & Source Fidelity

"The more specific the question, the more useful the answer. Name the account. Name the deal. Name the timeframe."

High-performing plays rely on foundational data parameters that ensure context accuracy and avoid hallucination:

- **Communication Data:** Captured automatically from email and calendar activity over the last 30 days.
- **CRM Data:** Real-time account and opportunity details sourced directly via Backstory.
- **Company News:** Public signals restricted to verified corporate sources and filings.

`communication_30d` `crm_realtime` `public_news_only`

Strategic Execution · Playbook

Execution & Actionability

```
"Draft a follow-up email based on our most recent conversation. Reference specific topics and outstanding risks."
```

Putting the six tailored plays into motion requires tight alignment between pipeline analytics and outward communication:

- **The News Hook (Play 6):** Triggers immediate outreach drafts based on real-time organizational shifts.
- **Deal Unsticker (Play 4):** Identifies stalling factors and highlights next strategic steps.
- **Scorecard Integration:** Advanced execution requires ClosePlan add-on activation.

`get_opportunity_status`

Backstory

CHAPTER 04 · MANAGER/VP PLAYS

Strategic Plays for *Revenue Leaders.*

Equipping management with real-time pipeline visibility, automated deal scoring, and prescriptive coaching tools to scale high-performing revenue organizations.

© Backstory | All Rights Reserved

Backstory

CHAPTER 04 · MANAGER & VP PLAYS

Plays for *leaders who need answers fast.*

Manager · Before every 1:1

Play 1: The Coaching Brief

You have four 1:1s today. You want to walk into each one already knowing what's happening on each rep's deals — without 30 minutes of prep.

> *"For [Rep Name]'s top three accounts, give me a status summary for each, flag any risks or signals that fired this week, and suggest one specific coaching question per account."*

AI reviews account status and recent activity for each deal, surfaces risk signals, and generates coaching questions grounded in what's actually happening — not what the rep said last week.

`find_account` `get_account_status` `ask_sales_ai_about_account`

Manager · Pipeline review

Play 2: The Risk Scan

It's Tuesday. You want to know which deals across your team need intervention before they become a forecast problem.

> *"Scan my top accounts and flag any deals that have risk signals, declining engagement, or open commitments that haven't been acted on in the last two weeks."*

AI uses top_records to surface your team's pipeline, then get_account_status to identify risk patterns across accounts — gives you the intervention list before your rep knows there's a problem.

`top_records` `get_account_status` `get_opportunity_status`

Manager · Buying committee coaching

Play 3: The Coverage Audit

You suspect your rep is only working one contact at a key account. You want data before the conversation.

> *"Who has [Rep]'s team been engaging at Northfield Co in the last 30 days? Show me by seniority and identify any executive or decision-maker personas with zero recent contact."*

AI returns the engaged people list with titles and recency — you can see in 10 seconds whether the rep is single-threaded, which buying groups are untouched, and where to coach the rep to multi-thread.

VP · Before forecast call

Play 4: The Commit Pressure Test

Your forecast call is in an hour. You have five deals in commit that you need to validate before you defend the number to your CRO.

> *"For each of these five opportunities [list them], give me a risk assessment based on recent engagement data. Flag any where the activity doesn't support the rep's forecast confidence."*

AI reviews opportunity status and recent activity for each deal, extracts risk signals, and tells you which commits are backed by real engagement and which ones require rapid executive sponsor outreach.

© Backstory | All Rights Reserved

Backstory

CHAPTER 04 · MANAGER & VP PLAYS

Plays for *leaders who need answers fast.*

VP · Pipeline narrative

Play 5: The Board Brief

You need to present pipeline health to the board. You want a narrative grounded in real engagement data — not what managers told you last Friday.

> *"Summarize the current health of our top 10 pipeline accounts. Identify which are progressing, which are stalled, and what the aggregate risk to this quarter's number looks like."*

AI reviews account status across your top records, synthesizes engagement trends, and drafts a board-ready pipeline narrative that's traceable to actual activity — not rep sentiment.

`top_records` `get_account_status` `ask_sales_ai_about_account`

VP · Account health

Play 6: The Churn Early Warning

You want to know which strategic accounts are showing early signs of disengagement before it becomes a renewal risk.

> *"Across my top accounts, which ones have shown declining engagement or reduced executive contact in the last 30 days? Rank by churn risk and suggest one intervention per account."*

AI surfaces accounts with engagement decay, identifies which decision-maker relationships have gone cold, and recommends specific interventions — weeks before the renewal conversation becomes uncomfortable.

`top_records` `get_account_status` `get_engaged_people` `ask_sales_ai...`

Summary of Platform Capability EXECUTIVE OVERVIEW

Enterprise Revenue Intelligence & Execution

Backstory MCP serves as the definitive analytical layer for revenue organizations. By directly auditing active engagement channels, the platform eliminates the subjectivity of representative forecasting and manual updates, replacing sentiment with observable, real-time activity metrics.

Through modular query tools (such as **`top_records`** and **`get_account_status`**), revenue leaders can systematically execute critical workspace playbooks, flag latent renewal or slippage risks, and structure prescriptive coaching workflows across their entire pipeline structure.

"Stop asking your team what's happening. Ask Backstory." MGR · VP

CHAPTER 05 · PROMPT LIBRARY

Copy. Paste. *Get the answer.*

Ready-to-use prompts organized by moment. Replace bracketed text with your specific account or deal names to instantly query Backstory.

MORNING STARTUP — ALL ROLES

Daily Focus & Risks

Quickly align on your top priorities and surface immediate pipeline challenges first thing in the morning.

"Show me my top accounts and flag anything that needs attention today."

`top_records` `get_account_status`

"What are the biggest risks across my pipeline right now based on recent activity?"

`top_records` `ask_sales_ai_about_account`

PRE-CALL PREP — AE

Customer Intelligence

Understand recent executive touchpoints, unresolved risks, and ongoing commitments before stepping into a meeting.

"Give me a pre-call brief for [Account] — last contacts, open commitments, and current risks."

`get_account_status` `get_engaged_people`

"Who have we talked to at [Account] in the last 30 days and what were the key topics?"

`get_recent_account_activity` `get_engaged_people`

DEAL & PIPELINE ANALYSIS — AE & AM

Execution & Health Reviews

Analyze deal mechanics and synthesize high-level pipeline health built on verified activity logs.

"Analyze the [Opportunity] deal. What are the risks and what is the one move to get it unstuck?"

`get_opportunity_status` `ask_sales_ai_...`

"Summarize pipeline health across my top 10 accounts. What is the aggregate risk?"

`top_records` `get_account_status`

Situation Search

Situation Search is a tool that lets you describe your current deal in plain language and returns comparable historical deals from your organization.

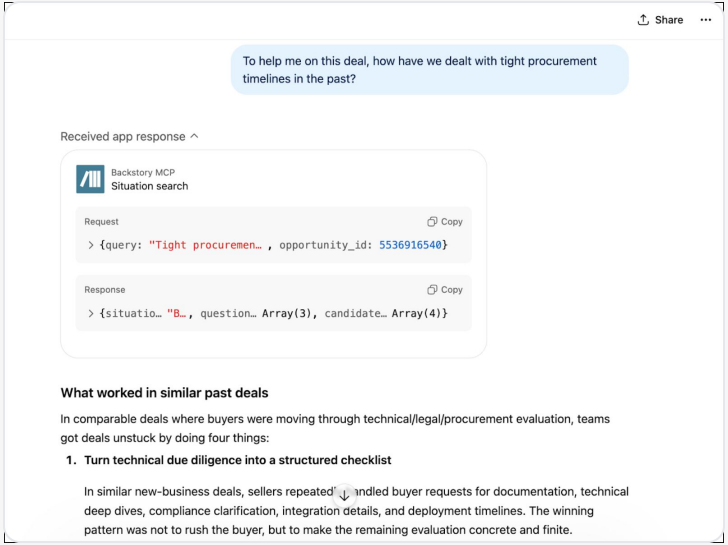

Results include deal profiles and winning tactics, helping you learn from past wins without relying on personal networks.

Note: *This feature is in beta. Requires organization enablement via Backstory.*

How to use Situation Search:

- Open your chat client connected to the Backstory MCP server.
- Describe your deal (e.g., "stuck at procurement")
- Submit the query
- Your LLM will work with you to identify winning tactics to apply

Learn More

Pro Tip: *Use specific details about procurement, legal or technical blockers for more accurate results.*

Backstory

Chapter 05 · Prompt Library

Query starters by role: *AE & CSM*

Copy and paste these prompts into your AI tool. Replace [Account] or [Opportunity] with specific names.

ACCOUNT EXECUTIVE (AE)

Pre-call prep
"What's the current status on [Account] and what should I focus on in today's call?"

Stakeholders
"Who at [Account] have we not engaged with recently that we should be talking to?"

Deal risk
"What are the main risks on the [Opportunity] deal right now?"

Commitments
"What follow-up items did we commit to on the last interaction with [Account]?"

Re-engagement
"[Account] has gone quiet. What's the best angle for re-engaging them?"

CUSTOMER SUCCESS (CSM)

Account health
"What's the overall health of [Account] and are there renewal risks I should know about?"

Expansion
"Are there signals in our interaction history with [Account] that suggest expansion?"

EBR prep
"Summarize the key themes, wins, and challenges with [Account] over the last quarter."

Champion check
"How is our relationship with [Contact] at [Account] trending?"

© Backstory | All Rights Reserved

Query starters by role: *Sales Manager & SDR*

Copy and paste these prompts into your AI tool. Replace [Account] or [Opportunity] with specific names.

SALES MANAGER

Pipeline review
"Which of my team's deals show the most risk heading into this week?"

Forecast check
"How confident should I be in current close dates based on engagement?"

Deal deep dive
"Walk me through everything that's happened on [Opportunity] in 30 days."

SDR

Warm path in
"Does anyone on my team have a strong relationship with someone at [Account]?"

Outreach
"Is there anything in [Account]'s recent activity that makes this a good time to reach out?"

Personalize
"Based on recent conversations with [Account], what topics are relevant for outreach?"

Backstory

CHAPTER 06 · THE SETUP

Connected in *under an hour.*

No change to how you use Backstory. No new system to learn. Just smarter AI tools.

GETTING STARTED — 4 STEPS

1. Identify your AI tool. Claude, Copilot, ChatGPT, or Cursor — MCP works with what you already use.

2. Pick your first play. Choose a target scenario from Chapter 3 or 4 to save immediate team time.

3. Configure workspace. Your CSM sets up the secure connection. Takes under an hour.

4. Run your first prompt. Use Chapter 5 prompts to start querying live pipeline data instantly.

SUPPORTED AI PLATFORMS

CURRENTLY AVAILABLE

Claude Desktop — Full integration

Microsoft Copilot — Enterprise-grade

ChatGPT — Integration available

Cursor, Goose, n8n — Dev tools

Glean — Knowledge integration

NOT YET AVAILABLE

Gemini app: not yet. Gemini CLI & Gemini Enterprise (beta): available.

SECURITY & INTEGRATION FAQ

Is this secure?

Yes. Read-only connection. Data never leaves Backstory; our MCP accesses it directly.

Do we change how we work?

Not at all. Keep using tools exactly as you do today. **Backstory MCP** integrates seamlessly with your existing workflows.

Can I trust the data?

Backstory MCP answers are grounded in your actual data. If data looks wrong, check your Backstory instance first. The AI is only as good as the data behind it. Work with your CSM if you have questions.

"Your AI assistant already knows how to reason. Now it knows your accounts. That's a different kind of intelligence."

Backstory

CHAPTER 07 · MAXIMIZING VALUE

Optimization & *getting support.*

Optimize your daily workflows with proven prompt strategies. Learn how to diagnose connection issues, resolve query errors, and quickly connect with our support team to keep your AI intelligence running flawlessly.

© Backstory | All Rights Reserved

CHAPTER 07 · MAXIMIZING VALUE

Best Practices for Productive Playbooks

01
Ask in Plain Language

You don't need to know tool names or parameters. Simply ask what you want to know. The AI handles tool selection and chaining automatically behind the scenes.

02
Use MCP for Pre-Call Prep

The highest-value daily use: run a rapid 60-second status check before any client call. Build this solid habit first before expanding to other complex workflows.

03
AI Account Finder

Don't look up Backstory IDs manually. Let the AI trigger `find_account`. If results are unexpected, check that the name matches Salesforce exactly.

04
Ask Sales AI Synthesis

Get Status provides summary overviews. Always ask Sales AI questions needing deep synthesis. Use it for strategic answers, not just a raw data read.

05
Company News Context

`account_company_news` only works for public companies. Private accounts will return empty—this is expected system behavior, not an integration error.

06
Next Steps as Actions

Status tools surface committed next steps from history. If you see an open commitment, proactively assign an owner and timeline to drive momentum.

YOUR SUPPORT SYSTEM

Your Backstory Support Ecosystem

Everything you need — from day one through the full lifecycle.

01

Your CSM

Primary point of contact for strategic support and journey guidance.

Reach out for:

- Strategy & adoption
- New use cases
- Urgent escalations

02

Technical Support

Hands-on investigation for bugs, integrations, and data issues.

Reach out for:

- Sync & API issues
- Data quality
- Product errors

support@backstory.ai

03

Help Center

Self-serve 24/7 library of guides and product documentation.

Find answers for:

- Feature walkthroughs
- Admin configuration
- Release notes

help.backstory.ai

04

Help Center Bot

Instant AI answers via natural language search.

Best for:

- Quick how-to's
- Instant article search
- After-hours support

© Backstory | All Rights Reserved

Troubleshooting & Support

Common issues, unexpected behaviors, and resolutions for Backstory MCP.

ACCOUNT NOT FOUND

Check the account name matches Salesforce (or CRM of choice) exactly. Try `find_record_by_crm_id` with the Salesforce ID. Data hygiene is key to system lookup accuracy.

EMPTY COMPANY NEWS

Expected behavior for private companies. The `account_company_news` tool only surfaces news for publicly traded entities. It will return empty for private accounts.

CONNECTION FAILURE

Verify configuration at `mcp.backstory.ai/mcp`. Ensure your OAuth session has not expired, and confirm that the API key is active within your environment.

INCORRECT TOOL INFO

Check contact OCRs or account domain details in Salesforce. MCP answers rely on the data feeding them; maintain Backstory UI hygiene for best results.

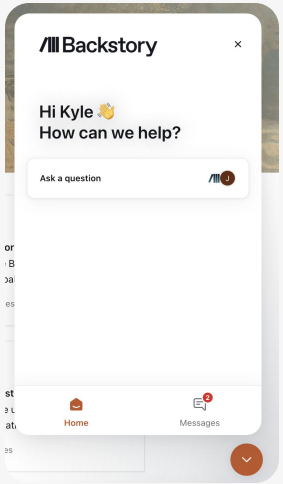

STILL NEED ASSISTANCE? For technical support, contact your Backstory CSM. Our team is ready to assist with custom workspace and connection configurations.

© Backstory | All Rights Reserved

SUPPORT & RESOURCES

Where to *go for help.*

During training prep, during the session, or after — **these are your go-to resources.**

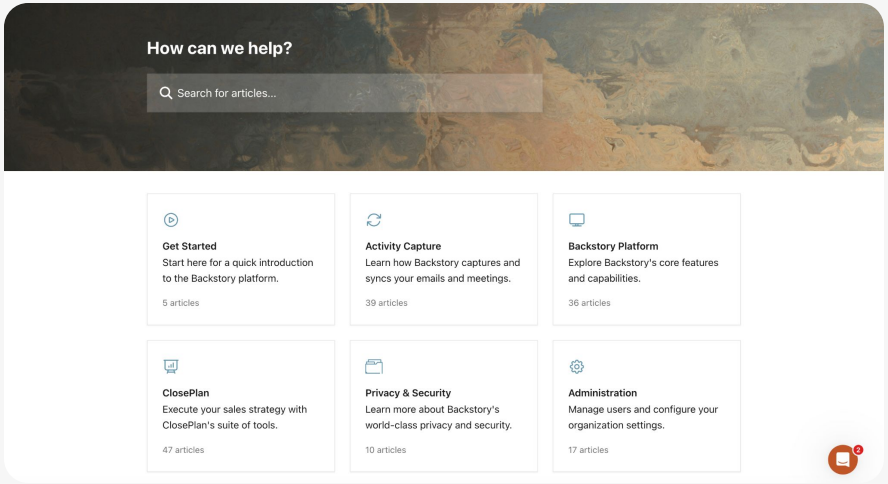

Help Center

Our Help Center gives you 24/7 access to hundreds of resources answering all of your questions.

Help Center Bot

Ask the bot quick questions and it will surface the resources you need instantly.

© Backstory | All Rights Reserved

Backstory

Thank You

Let's build the *future* of *sales together.*

Thank you for your time and partnership. Our team is ready to support your workspace configuration, data integrations, and user adoption from day one.
