04 Stretch it

MCP 101 · USE IT · WORKFLOW PLAYS

From prompt *to playbook*

Single prompts impress people once. Workflows are what keep them coming back.

Plays for reps, managers and VPs that run on a rhythm your team already keeps.

Every play has four parts

Learn the shape once, and any play in this deck reads the same way.

WHAT A PLAY IS

A short chain of questions you run at a moment you already have, like your morning or a 1:1, that ends in something you'd use anyway. Use these four parts to read the plays in this deck, or to build your own.

01 · WHEN

The trigger

A moment already on the calendar: the morning, the 1:1, the forecast call, the QBR.

02 · WITH

The ingredients

Backstory captures email, calendar and call activity, filters sensitive content and summarizes it. Calendar and email connectors add what's ahead.

03 · STEPS

The chain

Three or four questions, each one of the three kinds: one account or deal, a list, or Backstory's assistant.

04 · YOU GET

The deliverable

Something you'd use anyway: a plan, a brief, a narrative. Not a chat transcript.

EXAMPLE · REP MORNING PREP INTO WIN THE DAY, A SHORT DAILY PLAN OF TOP PRIORITIES, MEETINGS TO PREP AND FOLLOW-UPS TO SEND

One play per role, matched to its rhythm

Each role gets one play, tied to a meeting it already has. Pick yours and start there.

REP

Daily

9:00	Halden Freight	●
11:30	Corvia Health	●
2:00	Vantage Retail	●

Morning prep that builds your Win the Day plan

Start the day knowing which accounts need you, and why.

MANAGER

Weekly

1:1 and forecast call prep

Walk into every conversation with the evidence already in hand.

VP

Quarterly

QBR narrative from account risks and themes

Tell the story of the quarter from what actually happened in accounts.

PLAY 01 · REP · DAILY

Morning prep

Chained into your existing Win the Day framework. Ten minutes before the first call.

TODAY · TUESDAY		MOCK DATA
9:00	Halden Freight	CFO quiet 26 days
11:30	Corvia Health	Security review open
2:00	Vantage Retail	New VP engaged
4:00	Internal deal review	Bring pricing Q
■ Flags pulled from Backstory activity		

Know where to spend today before the first call

Win the Day is a short daily plan: your top two priorities, the meetings to prep and the follow-ups to send. Ask these four questions in one chat each morning to build it from today's calendar and Backstory's account context.

WHEN

Every morning, before your first meeting

WITH

Backstory, plus your calendar and email connectors in the same AI tool

YOU GET

Your Win the Day priorities, backed by account evidence

HOW TO · SAVE YOUR FORMAT ONCE

Add it to your Claude Project instructions, or save the whole play as a skill, so step 4 works every time:

"When I say Win the Day, use: top two priorities, meetings to prep, follow-ups to send."

STEP 1 *"Check my calendar: what meetings do I have today?"*

CALENDAR CONNECTOR · Your calendar connector lists the day. Backstory can't see the calendar ahead.

STEP 2 *"Help me prep for my call with Halden Freight."*

ONE ACCOUNT OR DEAL · Backstory brings the last 30 days, the risks and who's involved, for each account on the list.

STEP 3 *"Using Backstory, which of my deals closing this quarter have nothing on the calendar in the next 30 days?"*

ONE ACCOUNT OR DEAL · Catches deals with no next meeting. Check Backstory read it as your deals.

STEP 4 *"Put that into my Win the Day format: top two priorities, meetings to prep, and follow-ups to send."*

Drops straight into the framework your team already runs.

A Win the Day plan that writes its own first draft

Here's what the four questions give you. On the left, a typical morning. On the right, the Win the Day plan drafted from Backstory and your calendar.

BEFORE

Scanning the calendar, inbox and CRM, then deciding from memory.

Twenty minutes of tab-hopping, and the quiet deal still gets missed.

AFTER · CLAUDE WITH BACKSTORY MCP

MOCK DATA

Win the Day · Tuesday

PRIORITY 1	Vantage Retail: champion replied overnight asking about pricing. Send the revised proposal before the 2pm call.
PRIORITY 2	Halden Freight: no customer contact in 18 days. Re-engage the economic buyer.
PREP	11am with Corvia Health: last meeting flagged an open security review.
FOLLOW-UP	Send recap and next steps from yesterday's Vantage Retail demo.

WHY IT WORKS

The plan combines Backstory's last 30 days with today's calendar and inbox, so the deal with nothing scheduled shows up before it goes cold.

PLAYS 02-03 · MANAGER · WEEKLY

1:1 and forecast prep

Two plays for the two meetings that shape every week. Shown with before and after output.

THIS WEEK		MOCK DATA
Mon	Team review	Coaching focus
Tue	1:1 · Priya	Play 02
Tue	1:1 · Marcus	Play 02
Wed	Forecast call	Play 03

Every standing meeting has a prompt

Start the 1:1 at the conversation, not the status update

Ask these four questions before each 1:1. Backstory brings the risks and next steps on each deal, so the meeting can start at coaching.

WHEN

30 minutes before each 1:1

WITH

Backstory

YOU GET

A one-page brief per rep with coaching points

STEP 1 *“What deals does Priya Shah have closing this quarter? Give me the risks and next steps on each.”*

A LIST · The status update, done before you walk in.

STEP 2 *“Which of Priya Shah’s deals have nothing on the calendar in the next 30 days?”*

A LIST · Surfaces deals with no next meeting booked.

STEP 3 *“Who have we been talking to on the Halden Freight renewal, and when?”*

ONE ACCOUNT OR DEAL · Each person's last contact date shows single-threading worth coaching.

STEP 4 *“Turn that into a 1:1 brief: wins to recognize, two deals to dig into, and one coaching question.”*

A brief you can bring into the room.

From status readout to coaching conversation

The same 1:1, before and after. Backstory does the status prep, so the time goes to coaching the rep.

BEFORE

The rep walks through every deal, one by one.

Without Backstory doing the prep, the 1:1 turns into sifting through status instead of coaching the rep and building strategy.

AFTER · CLAUDE WITH BACKSTORY MCP

MOCK DATA

1:1 brief · Priya

RECOGNIZE	Vantage Retail: strong exec meeting last week, with next steps agreed.
DIG INTO	Halden Freight: 24 days without a customer meeting, close date this month.
DIG INTO	Corvia Health: only one contact engaged, no economic buyer yet.
ASK	“Who else at Corvia Health needs to say yes, and how do we reach them?”

WHY IT WORKS Backstory brings the status and the context behind it, ready to drill into. The 1:1 goes to coaching, strategy and next plays.

Walk into the forecast call knowing where to look

Ask these four questions before the forecast call. Backstory finds the deals with thin engagement and their risks. Backstory Forecasting shows what moved.

WHEN

Anytime before the forecast call. Answers are up to date with what Backstory has captured.

WITH

Backstory

YOU GET

Low-engagement deals and risks to dig into

IN BACKSTORY FORECASTING

STEP 1 “What deals does my team have closing this quarter?”

A LIST · The full list, without the spreadsheet export.

STEP 2 “Which of my team’s deals closing this quarter have engagement under 50?”

A LIST · Flags where engagement is thin.

STEP 3 “Any risks on the Halden Freight renewal deal?”

ONE ACCOUNT OR DEAL · Ask about each flagged deal that matters. Backstory doesn't predict which deals close.

STEP 4 “Give me three questions to ask on the call about those deals.”

Check what moved in Backstory Forecasting. Claude builds your call plan.

From spreadsheet archaeology to three sharp questions

Backstory Forecasting surfaces what moved and why. You walk into the call ready to challenge the right deals, not hunting for them.

BEFORE

Exporting the pipeline and comparing it to last week by hand.

An hour of prep, and the call still runs on the rep's word.

AFTER · CLAUDE WITH BACKSTORY MCP

MOCK DATA

Forecast prep · Week 7

MOVED	From Backstory Forecasting: two deals pushed close dates into next quarter.
AT RISK	Halden Freight: engagement under 50, CFO not in a meeting in 26 days.
UPSIDE	Vantage Retail: new VP stakeholder joined the last two meetings.
ASK	"What would have to be true for Halden Freight to sign this month?"

WHY IT WORKS Each call on the forecast comes with evidence, so the conversation moves from opinion to action.

Backstory Forecasting does the prep

Forecast changes live here, in the app. Backstory MCP can't read forecast data yet.

PIPELINE CHANGES

See what moved this week

Slipped, pulled in, pushed and won, with the deals behind each bar.

ASK ACROSS DEALS

Find the pattern in seconds

Ask Backstory about several deals at once and get the shared risks back.

PLAY 04 · VP · QUARTERLY

The QBR narrative

Built from account risks and themes, not a stack of rep updates.

Tell the story of the quarter from what actually happened

Ask these four questions two weeks before the QBR. Backstory brings the deals, the risks and the 90-day themes, and your AI tool drafts the narrative.

WHEN

Two weeks before the QBR

WITH

Backstory

YOU GET

A draft QBR narrative with the evidence behind each point

SAMPLE · QBR PREP

Q3 QBR · Narrative draft		MOCK DATA
WORKING	Exec sponsors active on Vantage Retail	
AT RISK	Two top deals with engagement under 50	
THEME	Pricing pressure across 90 days	
CHANGE	Bring finance in earlier	
 Drafted from Backstory summaries · last 30 and 90 days		

STEP 1 “What deals does my team have closing this quarter?”

A LIST · The deals the quarter depends on.

STEP 2 “Which of my team’s accounts have engagement under 30?”

A LIST · Where the risk is.

STEP 3 “Ask Backstory’s assistant what the big themes have been with Halden Freight over the last 90 days.”

BACKSTORY’S ASSISTANT · Repeat for each top account. Themes come back undated.

STEP 4 “Draft the QBR narrative: what’s working, what’s at risk, what we’re changing, with one account example for each.”

A first draft ready for your edits.

A narrative with receipts

The QBR story, before and after. Every claim comes with an account example and its time window.

BEFORE

Asking every manager for a summary, then stitching the slides together.

The story reflects what people remember, not what happened in accounts.

AFTER · CLAUDE WITH BACKSTORY MCP

MOCK DATA

QBR narrative · Draft

WHAT'S WORKING

Vantage Retail and Corvia Health have exec sponsors in recent meetings.

AT RISK

Halden Freight engagement is under 50, and the CFO hasn't joined a meeting in 26 days.

THEME

Pricing pressure came up across top accounts over the last 90 days.

WHAT CHANGES

Bring finance into the next meeting on each top deal.

WHY IT WORKS

The risks on your top deals and the 90-day themes, with an account example for each claim. Every figure names its window.

DID YOU KNOW?

Power moves

The most valuable capabilities are the ones nobody thinks to try.

BACKSTORY, CALENDAR AND EMAIL IN ONE MOCK DATA

↓

One prep brief

ONE PROMPT

Three moves that turn a play into a habit

Three things most teams never try. Each one saves a step every time you run a play.

01

Backstory, calendar and email in one prompt

Backstory brings the history. Calendar and email

TRY

“Check my calendar for tomorrow, then help me prep for each call using Backstory and the latest email thread.”

02

Standing instructions

A Claude Project that checks Backstory every time, so users stop re-explaining context.

TRY

“Use the full company name. ‘No data returned’ isn’t ‘no activity.’ Every number gets its time window.”

03

Output as the deliverable

Turn an account summary directly into a doc or a formatted brief for the exec sponsor.

TRY

“Turn this into a one-page brief for Vantage Retail’s exec sponsor.”

Set it once in a Claude Project

Here's what to write and what happens next: example instructions for an account executive, and a new chat that checks Backstory without being asked. Shown in Claude.

A Claude Project holds instructions that apply to every conversation inside it. Write them once, and every play starts with the same context.

GOOD TO INCLUDE

Your role and territory · Check Backstory first · Time windows ·
Your output formats

PROJECT INSTRUCTIONS · EXAMPLE

[EDIT FOR YOUR TEAM](#)

I'm an account executive covering mid-market retail accounts.

For any question about an account, deal or contact, check Backstory first. Give every number its time window.

If Backstory returns no data, say so. "No data returned" isn't "no activity."

When I ask for a brief, use three sections: what changed, risks, next steps.
